ABOUT US

Rooted in soil. Growing with farmers.

Avadh Agritech Pvt. Ltd. manufactures and markets quality crop-nutrition products that bring life back to the soil and confidence back to the farmer.

From bio-organic granules and phosphate-rich organic manure to zinc, iron and micronutrient fertilisers and trusted crop protection, every Avadh product is designed around one simple belief — **healthy soil grows healthy crops**. Our range helps farmers balance chemical inputs with organic nutrition, correct hidden deficiencies and get more from every acre, while keeping their land productive for generations.

We work with farmers directly and through a growing network of dealers and distributors, and we welcome new partners who share our commitment to honest quality.

Soil-First Nutrition
Organic and bio-based formulations that build soil health

Assured Quality
Consistent grade, accurate weight, batch-coded packs

Better Returns
Balanced nutrition for higher yield and better quality

Farmer First
Built for Indian crops, soils and seasons

INSIDE THIS CATALOGUE

01 **Bio-Organic Granules** — Vijeta, Dhan Varsha — 05

02 **Organic Manures** — Khushal Kisan, King PROM — 06

03 **Soil Conditioners & Secondary Nutrients** — Calcium Plus, Shakti Power — 07

04 **Micronutrients** — Fasal Growth, Super Sugarcane Special, Fasal Balwan, Gold Ferrous Sulphate, Shri Dayal Mono Zinc, Super Action Mono Zinc, Super Mono Zinc — 08

05 **Bio Stimulants** — Mono Shakti, Extra Care — 12

06 **Insecticides** — Super Shaktiman, Warrior, Jugnu, Fighter Plus, Tavera — 13

07 **Herbicides & Fungicides** — Butax Mix-50, Propagil, Protection — 16

Our Product Range

Twenty-three products. One goal — healthier crops and better harvests.

Bio-Organic Granules

Living granules that build soil organic matter and root strength.

BIO-ORGANIC GRANULES

विजेता
VIJETA

Granulated Bio-Organic Soil Enricher

A rich, granulated bio-organic formulation that rebuilds soil organic matter, feeds beneficial microbes and lays the foundation for strong, uniform crops. Ideal as a basal application with every sowing or planting.

KEY BENEFITS

- Improves soil structure, aeration and water-holding capacity
- Boosts beneficial microbial activity in the root zone
- Promotes vigorous root growth and a healthy crop stand
- Free-flowing granules — easy to broadcast and mix with basal fertilisers

Recommended for Cereals · Pulses · Vegetables · Fruits · Sugarcane · Plantation crops

APPLICATION	PACK SIZE	DOSE
Soil – broadcast / basal	**10 kg Bucket**	**As per label**

धन वर्षा
DHAN VARSHA

Granulated Bio-Organic Root Booster

Dhan Varsha energises the root zone so crops can draw more nutrients and water from the soil. Its granulated organic base keeps soil loose and lively, supporting better tillering, branching and a fuller harvest.

KEY BENEFITS

- Stimulates fresh white roots for better nutrient uptake
- Keeps soil friable and well aerated
- Supports strong tillering and early crop vigour
- Works hand-in-hand with chemical fertilisers

Recommended for Paddy · Wheat · Sugarcane · Potato · Vegetables · Pulses

BIO-ORGANIC GRANULES

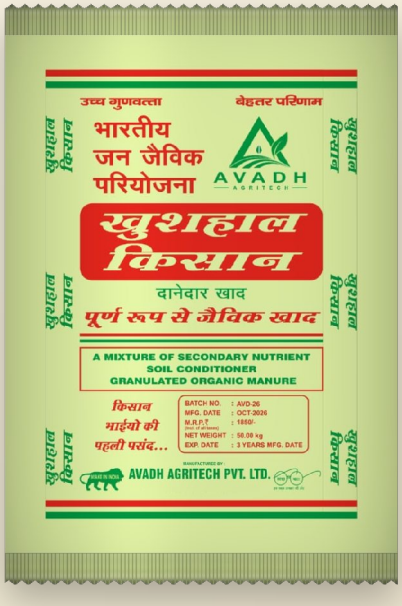

APPLICATION	PACK SIZE	DOSE
Soil – broadcast / basal	**10 kg Bucket**	**As per label**

Organic Manures

Organic nutrition that feeds the crop and restores the soil.

ORGANIC MANURE

खुशहाल किसान

KHUSHAL KISAN

Granulated Organic Manure with Secondary Nutrients

A fully organic granulated manure blended with secondary nutrients that conditions the soil while it feeds the crop. Khushal Kisan restores tired, over-cropped fields and builds long-term soil fertility — season after season.

KEY BENEFITS

- Supplies organic carbon along with secondary nutrients
- Conditions soil — improves tilth and moisture retention
- Enhances the efficiency of applied fertilisers
- 100% organic, granular and easy to apply

Recommended for All field crops · Sugarcane · Vegetables · Fruit orchards

APPLICATION	PACK SIZE	DOSE
Soil – basal / top dressing	**50 kg Bag**	**As per label**

किंग प्रोम

KING PROM

Phosphate Rich Organic Manure (PROM)

King PROM combines organic carbon with a high phosphate content that is released slowly through the season. It nourishes roots from sowing to flowering and builds soil life at the same time.

KEY BENEFITS

- Steady, season-long phosphorus availability
- Strong root development and early establishment
- Supports flowering, grain and pod formation
- Organic carbon enriches soil biology

COMPOSITION

Phosphate (P_2O_5)	Organic Carbon	Nitrogen	C:N Ratio	Moisture	pH
Min. 10.4%	**Min. 7.9%**	**Min. 0.4%**	**< 20:1**	**Max. 25%**	**6.7**

Recommended for Wheat · Paddy · Pulses · Oilseeds · Vegetables · Sugarcane

APPLICATION	PACK SIZE	DOSE
Soil – basal	**50 kg Bag**	**As per label**

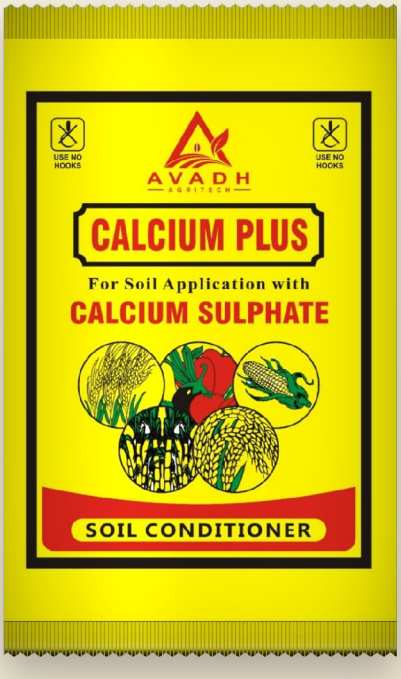

ORGANIC MANURE

Soil Conditioners & Secondary Nutrients

Calcium and sulphur — the often-forgotten pillars of crop quality.

SOIL CONDITIONER

कैल्शियम प्लस

CALCIUM PLUS

Calcium Sulphate · Soil Conditioner

Calcium Plus supplies two essential secondary nutrients — calcium and sulphur — while improving the physical condition of hard and sodic soils. Stronger cell walls mean firmer produce and better pod and fruit filling.

KEY BENEFITS

- Supplies readily available calcium and sulphur
- Loosens hard, crusted and sodic soils
- Better pod filling in groundnut and pulses
- Reduces calcium-related disorders such as blossom-end rot

Recommended for Groundnut · Pulses · Oilseeds · Tomato · Potato · Fruits

APPLICATION	DOSE
Soil application	**As per label**

शक्ति पावर

SHAKTI POWER

Bio Sulphur 90% (Sulphur + Bio Stimulant)

A high-strength sulphur fertiliser fortified with a bio-stimulant. Sulphur is vital for protein and oil formation, while the bio-stimulant keeps roots active — for a healthy crop and a bountiful harvest.

KEY BENEFITS

- 90% sulphur for protein, oil and chlorophyll formation
- Higher oil content and better quality in oilseeds
- Improves availability of micronutrients in the root zone
- Bio-stimulant supports root vigour and stress tolerance

Recommended for Mustard · Soybean · Groundnut · Onion & Garlic · Pulses · Sugarcane

SECONDARY NUTRIENT

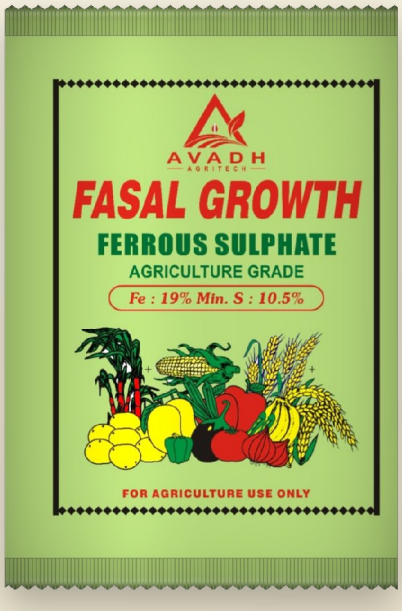

APPLICATION	DOSE
Soil application	**As per label**

Micronutrients

Small doses, big difference — correcting hidden hunger.

MICRONUTRIENT

फसल ग्रोथ

FASAL GROWTH

Ferrous Sulphate · Agriculture Grade

Agriculture-grade ferrous sulphate that quickly corrects iron deficiency — the yellowing of young leaves between green veins. Restoring iron restores chlorophyll, giving crops their deep green colour and full growth potential.

KEY BENEFITS

- Corrects iron deficiency and leaf yellowing (chlorosis)
- Supports chlorophyll formation and photosynthesis
- Also supplies sulphur for balanced nutrition
- Especially useful in high-pH and calcareous soils

COMPOSITION

Iron (Fe)	Sulphur (S)
Min. 19%	**10.5%**

Recommended for Paddy · Sugarcane · Wheat · Groundnut · Vegetables · Fruits

APPLICATION	DOSE
Soil application	**As per label**

सुपर शुगरकेन स्पेशल

SUPER SUGARCANE SPECIAL

Micronutrient Mixture Fertiliser

A micronutrient mixture formulated for the long growing cycle of sugarcane. It prevents hidden hunger, keeps the canopy green and helps every cane reach its full length, girth and weight.

KEY BENEFITS

- Balanced micronutrients tailored for sugarcane
- Better tillering and more millable canes
- Improved cane length, girth and weight
- Supports juice quality and sugar recovery

Recommended for Sugarcane (plant crop) · Ratoon crop

MICRONUTRIENT

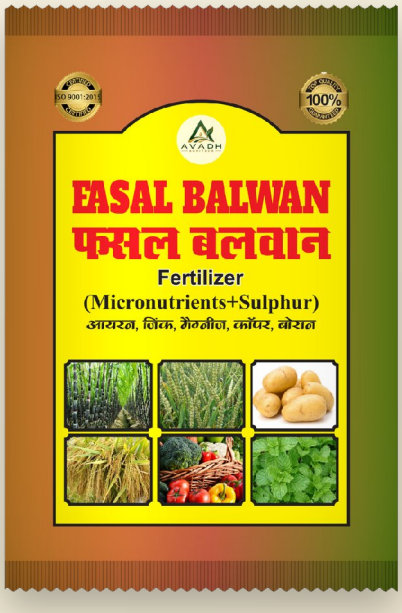

APPLICATION	DOSE
Soil application	**As per label**

Micronutrients

Small doses, big difference — correcting hidden hunger.

MICRONUTRIENT

फसल बलवान

FASAL BALWAN

Micronutrient Mixture + Sulphur

A fast-acting mixture of five micronutrients with sulphur. Mixed with organic manure and broadcast over a standing crop, it reduces flower drop, increases fruit set and gives bigger, better-shaped tubers and fruits.

KEY BENEFITS

- Iron, zinc, manganese, boron and copper in one pack
- Reduces flower drop for more flowers and fruit
- Bigger, well-formed tubers and fruits
- Builds the crop's resistance to disease

COMPOSITION

Zinc (Zn)	Iron (Fe)	Manganese (Mn)	Boron (B)	Copper (Cu)
10%	5%	2%	1%	1%

Recommended for Wheat · Paddy · Sugarcane · Potato · Vegetables

APPLICATION	PACK SIZE	DOSE
Broadcast with organic manure	1 kg	5–10 kg/acre

गोल्ड फेरस सल्फेट

GOLD FERROUS SULPHATE

Ferrous Sulphate 12% EDTA · Chelated

Chelated iron (EDTA) that stays available to the plant even in high-pH soils. Iron is central to chlorophyll, protein and enzyme formation, so crops stay deep green and better able to resist disease.

KEY BENEFITS

- EDTA-chelated iron for efficient uptake
- Helps chlorophyll (green colour) formation
- Supports protein and enzyme formation
- Improves the crop's resistance to disease

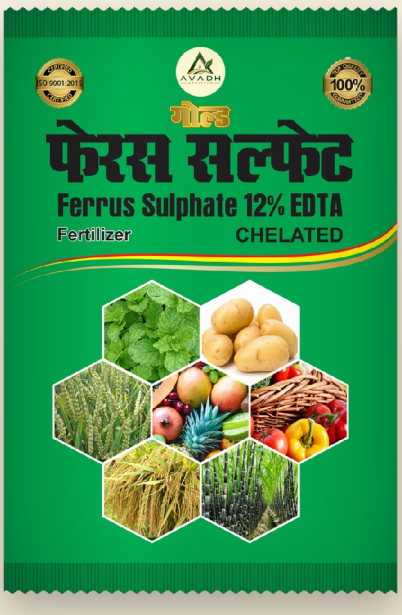

COMPOSITION

Iron (Fe-EDTA)
12%

Recommended for Sugarcane · Wheat · Paddy · Maize · Potato · Groundnut · Soybean · Mustard · Grapes · Tomato

APPLICATION	PACK SIZE	DOSE
Basal / top dressing	1 kg	2 kg/acre

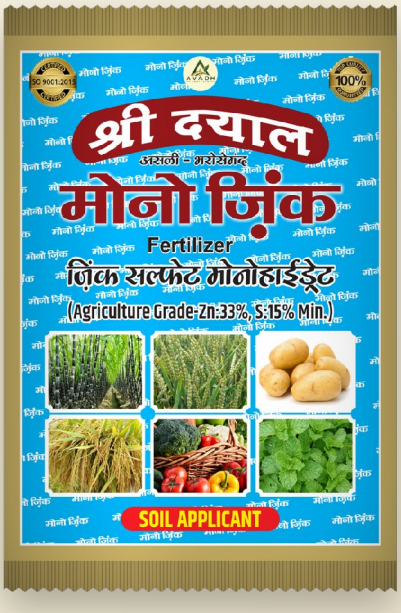

MICRONUTRIENT

Micronutrients

Small doses, big difference — correcting hidden hunger.

MICRONUTRIENT

श्री दयाल मोनो ज़िंक

SHRI DAYAL MONO ZINC

Zinc Sulphate Monohydrate · Zn 33%, S 15%

Agriculture-grade zinc sulphate monohydrate for soil application. Zinc is essential for growth hormones and healthy new leaves, and corrects the stunting and khaira disease that zinc-deficient soils cause in paddy and wheat.

KEY BENEFITS

- High-strength zinc (33%) plus sulphur (15%)
- Corrects zinc deficiency and khaira disease in paddy
- Better tillering, leaf growth and grain filling
- Use at last ploughing or as a foliar spray when deficiency shows

COMPOSITION

Zinc (Zn)	Sulphur (S)
Min. 33%	**Min. 15%**

Recommended for Paddy · Wheat · Sugarcane · Potato · Vegetables · Mint

APPLICATION	PACK SIZE	DOSE
Soil / foliar spray	**1 kg**	**5 kg/acre (soil)**

सुपर एक्शन मोनो ज़िंक

SUPER ACTION MONO ZINC

Shri Anmol · Chelated Zinc Sulphate Monohydrate

A fast-acting chelated zinc fertiliser made with new technology, supplying 33–35% zinc and 15–16% sulphur. Use it as soon as zinc deficiency appears — mixed with dry soil or sand for top dressing, as a foliar spray, or through drip irrigation.

KEY BENEFITS

- Chelated for quick uptake by the plant
- 33–35% zinc with 15–16% sulphur
- Works as top dressing, foliar spray or through drip
- Visible improvement in cereals, pulses, oilseeds, fruits and vegetables

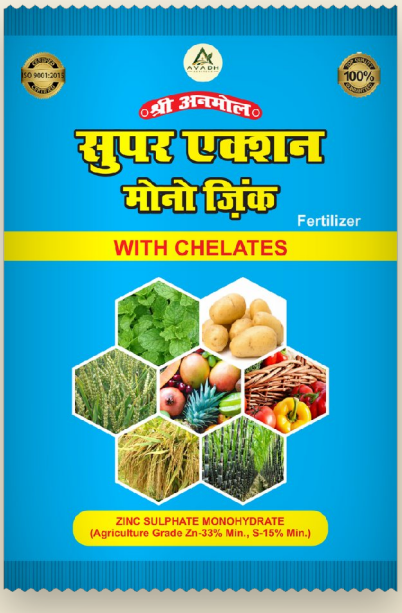

COMPOSITION

Zinc (Zn)	Sulphur (S)
33–35%	**15–16%**

Recommended for Cereals · Pulses · Oilseeds · Fruits · Vegetables

APPLICATION	DOSE
Top dressing / spray / drip	**250 g + 1 kg urea in 150 L water (spray)**

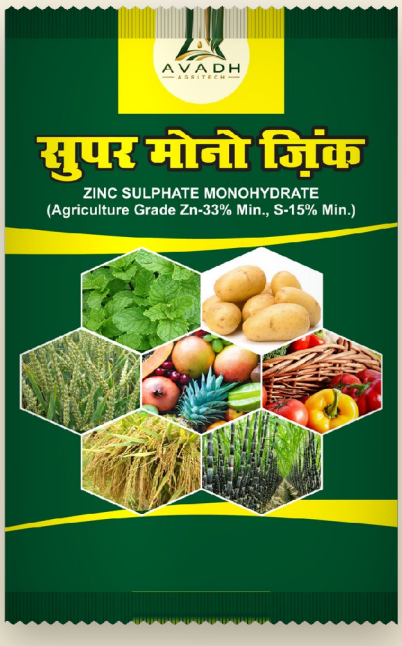

MICRONUTRIENT

Micronutrients

Small doses, big difference — correcting hidden hunger.

MICRONUTRIENT

सुपर मोनो ज़िंक

SUPER MONO ZINC

Zinc Sulphate Monohydrate · Agriculture Grade

Agriculture-grade zinc sulphate monohydrate with a minimum of 33% zinc and 15% sulphur. A dependable way to correct zinc deficiency and keep crops green, vigorous and productive.

KEY BENEFITS

- Minimum 33% zinc and 15% sulphur
- Corrects zinc deficiency and leaf discolouration
- Supports growth hormones, tillering and flowering
- Suitable for cereals, sugarcane, vegetables and fruits

COMPOSITION

Zinc (Zn)	Sulphur (S)
Min. 33%	**Min. 15%**

Recommended for Paddy · Wheat · Sugarcane · Potato · Vegetables · Fruits

APPLICATION	DOSE
Soil application	**As per label**

Spot the hunger: micronutrient deficiency signs

Zinc
Stunted plants, short internodes, rusty-brown spots on older leaves; khaira disease in paddy.

Shri Dayal / Super Mono Zinc

Iron
Young leaves turn yellow between green veins (chlorosis), mostly in high-pH soils.

Fasal Growth / Gold Ferrous

Manganese
Grey or pale spots between veins of middle leaves; weak, thin growth.

Fasal Balwan

Boron
Flower and fruit drop, hollow stems, cracked or deformed fruits.

Fasal Balwan

Copper
Tip die-back, wilting and pale young leaves; poor grain setting.

Fasal Balwan

Multiple (sugarcane)
Pale canopy, fewer tillers and thin canes in long-duration crops.

Super Sugarcane Special

If you see these signs, call us for the right product and dose.

Bio Stimulants

Activating the plant's own growth engine.

BIO STIMULANT

मोनो शक्ति

MONO SHAKTI

Bio Stimulant · For Soil Application

Mono Shakti activates the natural growth processes of the plant from the root up. Crops grow more uniformly, use applied nutrients more efficiently and stand up better to heat and moisture stress.

KEY BENEFITS

- Stimulates root and shoot growth
- Improves nutrient-use efficiency
- Helps crops tolerate heat and moisture stress
- Supports uniform flowering and fruit set

Recommended for Paddy · Wheat · Potato · Sugarcane · Vegetables · Fruits

APPLICATION	DOSE
Soil application	**As per label**

एक्स्ट्रा केयर

EXTRA CARE

98% Soluble Super Potassium F-Humate

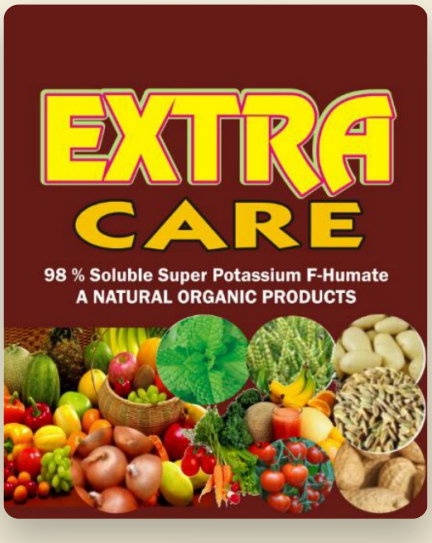

A natural, fully water-soluble potassium humate. Humic and fulvic acids improve soil structure and help roots take up more of the nutrients already in the soil, so every other input works harder.

KEY BENEFITS

- 98% water-soluble — for spray or drip
- Stimulates strong root growth
- Improves nutrient uptake and fertiliser efficiency
- Natural organic product that builds soil health

Recommended for All crops · Vegetables · Fruits · Pulses · Cereals

BIO STIMULANT

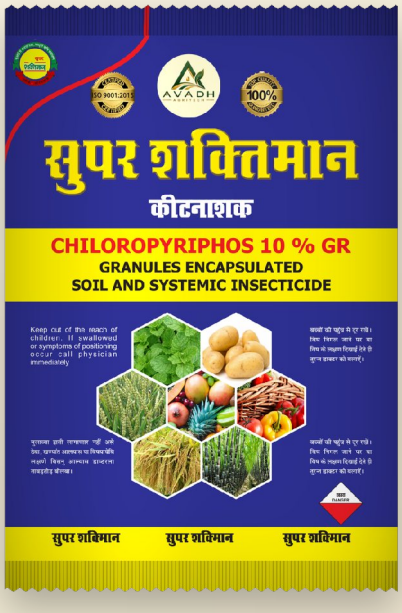

APPLICATION	DOSE
Soil / spray / drip	**As per label**

Insecticides

Crop protection against chewing, sucking and soil pests.

INSECTICIDE

सुपर शक्तिमान

SUPER SHAKTIMAN

Chlorpyriphos 10% GR · Soil & Systemic Insecticide

Encapsulated granules of chlorpyriphos for soil application. It controls soil and stem pests such as termites, stem borers, gall midge and cutworms in cereals, cotton, sugarcane and vegetables.

KEY BENEFITS

- Granular — easy to broadcast in the field
- Soil and systemic action against hidden pests
- Controls termites, stem borer, gall midge and cutworms
- For barley, maize, paddy, jowar, cotton, sugarcane and vegetables

Recommended for Paddy · Maize · Barley · Jowar · Cotton · Sugarcane · Vegetables

APPLICATION	PACK SIZE	DOSE
Soil application	1 kg	As per label

वॉरियर

WARRIOR

Lambda-Cyhalothrin 5% EC

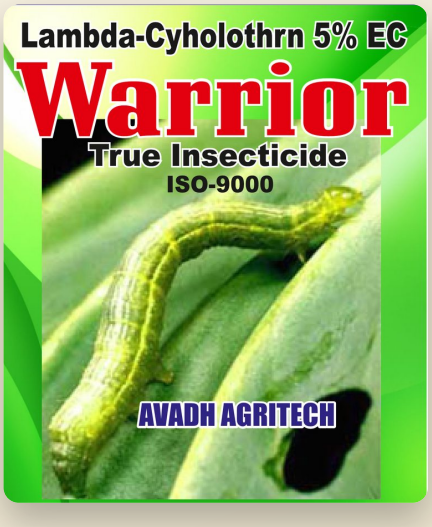

A fast knock-down insecticide for chewing and sucking pests. Recommended for gall midge, green leaf hopper, hispa, leaf roller and stem borer in paddy, cutworm in wheat, aphid in cotton and semilooper in castor.

KEY BENEFITS

- Quick knock-down on contact and ingestion
- Controls gall midge, leaf hopper, hispa and leaf roller
- Effective against stem borer and cutworm
- Protects paddy, wheat, cotton and castor

Recommended for Paddy · Wheat · Cotton · Castor

INSECTICIDE

APPLICATION	PACK SIZE	DOSE
Foliar spray	1 Litre	As per label

Insecticides

Crop protection against chewing, sucking and soil pests.

INSECTICIDE

जुगनू
JUGNU

Thiamethoxam 25% WG · Broad-Spectrum Systemic Insecticide

A systemic insecticide with stomach and contact action. It moves through the plant to control sucking and boring pests — brown plant hopper, white-backed hopper, jassids, aphids, thrips and whiteflies — across field crops, vegetables and plantations.

KEY BENEFITS

- Systemic — protects new growth from inside
- Controls plant hoppers, jassids, aphids, thrips and whitefly
- Also controls gall midge, stem borer and leaf folder
- For rice, wheat, cotton, mustard, mango, vegetables and tea

Recommended for Paddy · Wheat · Cotton · Mustard · Tomato · Brinjal · Mango · Tea

APPLICATION	PACK SIZE	DOSE
Foliar spray	**500 g**	**As per label**

फाइटर प्लस
FIGHTER PLUS

Emamectin Benzoate 5% · Insecticide & Acaricide

Controls caterpillars at low doses. Recommended for bollworms in cotton and the major insect pests of okra, cabbage, chilli, brinjal, red gram and chickpea, and for thrips on grapes.

KEY BENEFITS

- Strong action against bollworms and caterpillars
- Also controls thrips and mites
- Effective at low dose
- For cotton, vegetables, pulses and grapes

Recommended for Cotton · Okra · Cabbage · Chilli · Brinjal · Red gram · Chickpea · Grapes

INSECTICIDE

APPLICATION	PACK SIZE	DOSE
Foliar spray	**100 ml**	**As per label**

Insecticides

Crop protection against chewing, sucking and soil pests.

BIO PESTICIDE

टवेरा

TAVERA

Liquid Bio Pest Controller

A liquid biological formulation made from beneficial microbes grown under controlled conditions. It controls many types of insect pests while supporting plant health, and is recommended across field crops, fruits and fodder crops.

KEY BENEFITS

- Biological — based on beneficial microbes
- Controls a wide range of insect pests
- Supports plant health and yield
- For field crops, vegetables, fruits and fodder

Recommended for Mustard · Soybean · Sugarcane · Groundnut · Sunflower · Paddy · Wheat · Peas · Vegetables · Citrus

APPLICATION	PACK SIZE	DOSE
Foliar spray	**10 ml**	**As per label**

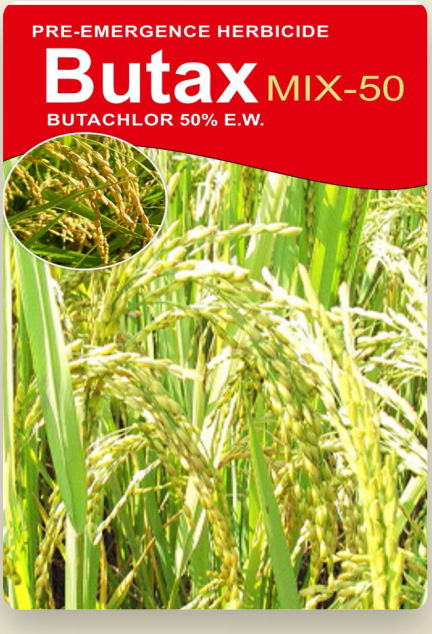

Safe use of crop protection products

- Read the label and leaflet before use; use only the recommended dose.
- Wear gloves, mask and full-sleeved clothes while mixing and spraying.
- Do not eat, drink or smoke while spraying; spray with the wind, not against it.
- Keep away from children, food and animal feed; destroy empty containers.
- In case of poisoning, show the label to a doctor immediately.

Herbicides & Fungicides

Weed control for paddy and broad-spectrum disease control.

HERBICIDE

बुटाक्स मिक्स-50

BUTAX MIX-50

Butachlor 50% EW · Pre-Emergence Herbicide

A selective pre-emergence herbicide for transplanted paddy. Applied to moist soil within 4 days of transplanting, it stops grasses, sedges and broad-leaf weeds such as barnyard grass, Cyperus and Echinochloa before they germinate.

KEY BENEFITS

- Selective — safe on transplanted paddy
- Controls grasses, sedges and broad-leaf weeds
- Stops weeds before they germinate
- Saves labour on manual weeding

Recommended for Transplanted paddy

APPLICATION	PACK SIZE	DOSE
Spray on moist soil	**500 ml**	**2.5–3.0 L/hectare in 250–500 L water**

प्रोपजिल

PROPAGIL

Propaquizafop 10% EC

A herbicide for transplanted paddy that controls Cyperus difformis, Cyperus iria, Echinochloa colona, Eleusine indica and other weeds.

KEY BENEFITS

- Controls key grass and sedge weeds
- Controls Cyperus, Echinochloa and Eleusine
- For transplanted paddy
- Easy to mix and spray

Recommended for Transplanted paddy

HERBICIDE

APPLICATION	PACK SIZE	DOSE
Spray	**1 Litre**	**50 ml per 15 L water**

Herbicides & Fungicides

Weed control for paddy and broad-spectrum disease control.

FUNGICIDE

प्रोटेक्शन

PROTECTION

Carbendazim 12% + Mancozeb 63% WP

A combination fungicide with systemic and contact action. It controls powdery mildew, anthracnose, blights, rots, blast, sheath blight and other diseases across fruits, vegetables and field crops.

KEY BENEFITS

- Two actions — systemic plus contact
- Controls blast and sheath blight in paddy
- Controls early and late blight in potato
- For mango, grapes, wheat, vegetables, peas and more

Recommended for Paddy · Potato · Wheat · Mango · Grapes · Chilli · Peas · Apple

APPLICATION	PACK SIZE	DOSE
Foliar spray	**1 kg**	**As per label**
